

# AppTip Sheet – Using Okolo Website to Display Panoramas 360-Degree VR Images

This AppTip Sheet describes how to upload images and create a panorama or 360-degree VR image using the free site, [www.okolo.com](http://www.okolo.com).

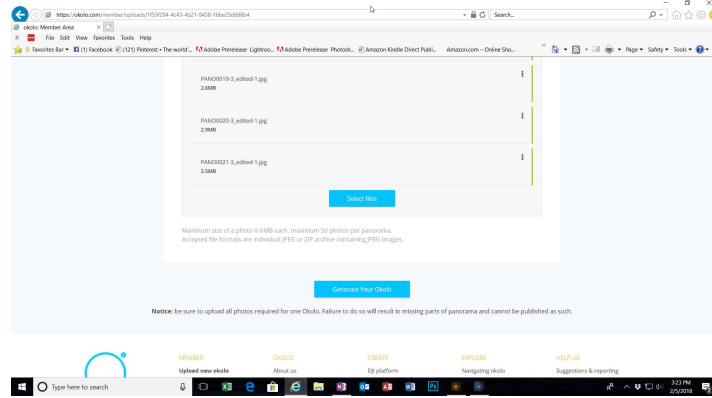

1. Take the series of photos using the desired technique and software.
  - a. Okolo also has an iOS app that can control the Mavic to do this.
  - b. Only JPEG images, 5 Mb or less are accepted, but the can be in a ZIP file.
  - c. At least 10 images are required.
2. Open Okolo and log in.
3. Click on **Upload New Okolo**. Give the project an internal name.

4. Click on **Select Files** and then select them.

5. Click **Open** to exit and begin the uploading.
6. When uploading is complete, click on **Generate your Okolo**.

7. After a couple of minutes, the pano will be in your panos list.
